Click™ Portal for Safety Committees

Configurable Software to Manage Safety Compliance

Strengthen your safety committee oversight processes while accelerating preparation, submission, and review of research studies. Click™ Portal for safety committees incorporates forms for Institutional Biosafety (IBC), Radiation Safety, and Chemical Safety. The software accommodates standalone safety committee applications or integration with IRB, IACUC, or other compliance and funding processes.

When your safety committee application is integrated with an IRB or IACUC system, you can decide whether to track safety proposals serially or in parallel with the other compliance process, and you can change your workflow routing as conditions dictate. Your Click™ Portal safety solution can be configured to match your institution's processes, with guided input and error checking to ensure accurate submissions.

Only Click™ Portal

- Integrates tightly with the industry's leading suite of compliance solutions

- Is architected to allow customers to easily modify safety forms and workflows

- Enables sharing best practices via the industry's most active vendor user group
