THE BUSINESS OF RESEARCH IS ONLY GETTING MORE COMPLEX AND CHALLENGING

- 200

In today's fiercely competitive research environment, it's increasingly difficult to maintain a world-class research enterprise — the work that moves society forward, improving health, spurring innovation and advancing knowledge.

Concurrently, federal funding is flat and state budgets are shrinking. All the while, institutions are expected to cover their research projects' administrative costs. Not only do institutions need to contribute more money to the cause, but researchers barely spend half their time doing actual research. The rest of their time is spent navigating governmental and institutional rules and struggling with disparate tools across the research enterprise, which hinder productivity. These strained resources require even more efficient practices to cut costs and improve workflows.

HURON INTRODUCES HURON RESEARCH SUITE: AN INTEGRATED, STREAMLINED EXPERIENCE

Huron Research Suite does just that — these software solutions help manage the business of research, driving efficiency and productivity. Flexible, scalable and configurable, our solution streamlines workflow and supports compliance.

Specifically, it lets principal investigators conduct research more effectively and efficiently, allowing them to quickly and easily communicate with their administrative teams while helping administrators and reviewers best support their part of the research enterprise. Plus, it reduces institutional compliance risk by managing processes in a demanding regulatory environment, allowing researchers to focus on what matters most — the research.

Our research software is already in use at leading academic medical centers, hospitals, and both government and private research organizations. It features new enhancements — most notably, a more user-friendly experience, consistent functionality across solutions and a unified appearance, helping to reduce training and ongoing maintenance costs.

HURON RESEARCH SUITE SOLUTIONS

Our Suite comprises seven primary solution areas, each serving a different aspect of the research enterprise, from Agreements to Clinical Trials to Grants. An overview of the solution areas is detailed in the table below.

SOLUTION	SUMMARY
Agreements	Streamlines the approval and management of your financial and non-financial research agreements by maintaining a single repository for all types.
Clinical Trial Management System (CTMS)	Aids in the administration of clinical trials and empowers research organizations to improve overall financial management of clinical trials.
Conflict of Interest (COI)	Provides a solution for all types of disclosures, managing both individual and institutional conflicts. Supports three primary types of certification — transactional, annual and research specific.
Grants	Facilitates collaborative online budgeting and award management through a standard institutional routing sheet and centralized eSubmission system.
Institutional Animal Care & Use Committee (IACUC)	Supports the efficient creation and review of animal protocols, reducing non-compliance risk.
Institutional Review Board (IRB)	Automates and streamlines the process of human protections.
Safety	Improves collaboration between investigators, Safety staff, and committee members — from new protocols to amendments to continuing reviews.

AN INTEGRATED EXPERIENCE ACROSS SOLUTIONS

Standalone tools hinder efficiency and the overall productivity of the research process. With the software is integrated and the functionality consistent across solutions, making for a more unified and user-friendly experience.

A consistent user interface among all solutions makes for a more user-friendly experience.

THE HURON DIFFERENCE

- Huron's Education Research practice has partnered with 550+ institutions for a total of 3,500+ engagements — including 95 of the top 100 research institutions.
- Proven implementation methodology and extensive experience with both academic medical centers and higher education institutions.

CLIENT FEEDBACK FOR HURON'S RESEARCH SOFTWARE

"Huron's guidance was key to our success. This has been a great relationship and has resulted in tremendous improvements for our researchers, staff and board members. CATS IRB is appreciated by those who use it regularly and feedback from the research community has been extremely positive. We look forward to continuing to partner on other projects."

Candice "Candy" Yekel,

Associate Vice President for Research, Director, Office for Research Protections **Pennsylvania State University**
