

# SIMPLE LEADERSHIP STRATEGIES FOR TRANSFORMING YOUR INSTITUTION THROUGH THE CLOUD

Cloud transformations are demanding — but the rewards substantial.

Cloud technology adapts to an institution's changing needs and eliminates the need for costly modifications. To better standardize and pace your implementation, focus on:

## BUSINESS PROCESS DESIGN

Review current business processes, identify operations needing further efficiency

## CHANGE MANAGEMENT

For rapid adoption, establish permanent change-management capabilities

## CUSTOMIZED TRAINING

Overcome resistance to change by identifying training needs, objectives, and subject-matter content

## PRE-LAUNCH PROJECT PLANNING

Detail your implementation timeline, engage with key business partners, form a project plan
