

# HURON COI

THE BUSINESS OF RESEARCH IS ONLY GETTING MORE COMPLEX

The fiercely competitive research environment challenges institutions to maintain a world-class research enterprise that moves society forward, promotes innovation and advances knowledge — all without adding additional administrative burden to researchers.

**Increase institutional compliance and streamline disclosure processes** with an electronic centralized conflict of interest (COI) management

system that eliminates process roadblocks. Huron's COI solution lets you integrate annual disclosure data with related research certifications such as IRB studies and funding proposals. You can also easily reconfigure the system to meet new internal or external requirements. Over 60 leading research institutions currently manage their COI compliance efforts with Huron COI.

Huron COI is part of the Huron Research Suite, a comprehensive solution to facilitate communication, relieve administrative burden and free up time for what matters most — your research mission.
