

# IMPORTANT BUSINESS PROCESS CONSIDERATIONS AND STEPS TO TAKE FOR CLOUD IMPLEMENTATION

## TAKE AN INVENTORY OF CURRENT BUSINESS PROCESSES AND REPORTS

### Deliverables:

- Chart of accounts structure assessment/recommendations
- Business process inventory
- Reporting needs
- Identify gaps

### Ask these questions:

- What's delivered and how can we use it?
- How are we supporting our guiding principles?
- What about the business processes is preventing us from supporting our mission?

## MAP FUTURE-STATE PROCESSES TO OUT-OF-THE-BOX PROCESSES FROM THE SOFTWARE AND HURON

## USING AN ITERATIVE APPROACH, DEVELOP FINAL FUTURE-STATE BUSINESS PROCESSES

### Continue to workshop, question and test your processes, while looking to your project guiding principles

- Keep asking, "How can we use what's delivered?"
- If you receive pushback, ask: "Why won't what's delivered work?"
- "If we configure it more simply than the way we do it today, why won't that work for you?"
- Ask, "Will this not work for you because of regulations, policy or because that's the way it has always been done?"
