

TELEHEALTH FOR FEDERAL HEALTHCARE ORGANIZATIONS

Improve Quality of Care, Patient Access to Care and Interoperability

Most major healthcare systems are looking to telehealth to transform and to re-create the healthcare they deliver. Adoption of telehealth technologies is growing as healthcare organizations look to lower costs and increase access to care.

Telehealth helps healthcare organizations respond to consumers' demands for convenience and proximity of services and can be leveraged across the entire care continuum:

PROVIDER TO PATIENT

PROVIDER TO PROVIDER

VIRTUAL VISITS

MOBILE HEALTH AND EDUCATION

REMOTE PATIENT MONITORING

Areas of care telehealth can address include but are not limited to:

- Urgent Care (24/7 service)
- Tele-Stroke
- Mental Health/Tele-Psychology
- After-hours Care/Triage
- Post-Hospital Discharge/Transitional Care
- Tele-Pharmacology
- Home Health Care
- Chronic Disease Management
- Disaster Management
- Consumer and Professional Education
- PT, OT, SLP
- Remote Patient Monitoring

Telehealth programs allow organizations to offer consumer-centric care while improving organizational effectiveness.

Benefits include:

- Increased consumer access to care, including underserved populations
- Lowered cost
- Improved patient satisfaction
- Consumer access to immediate care
- Reduced readmissions
- Chronic condition management
- Improved patient compliance

INSTITUTING INDUSTRY BEST PRACTICES IN TELEHEALTH

With such a wide variety of applications to choose from, it's important to fully plan for telehealth program implementations that support future strategy and goals to transform care. Huron works side by side with you as your trusted transformation partner through assessment, vendor selection and implementation of your telehealth programs.

ASSESSMENT

Together, we:

- Perform a comprehensive analysis of telehealth service needs within the organization
- Identify areas of concern around underutilization, licensure/credentialing, interoperability, and reimbursement
- Identify the best use case design for each application of telehealth
- Develop a roadmap and implementation plan
- Apply industry best practice standards

VENDOR SELECTION

We work with you to evaluate and select the platform applications best suited for your long-term goals in telehealth. We work together to:

- Evaluate various telehealth systems
- Provide system comparison based on organizational goals
- Provide total cost of ownership (TCO)
- Assist with vendor negotiations

IMPLEMENTATION

We provide:

- Experienced telehealth project management
- Clinician training on system functionality and new workflows
- Full system implementation and integration
- Use-case development
- Long-term strategic planning
